

October 2021 – Gretton

Today, 15 members of the Shamblers set off on a 5 mile, circular walk from the Hatton Arms in Gretton.

On leaving the village, we picked up a track giving us views over the Welland Valley and were able to see the Haringworth Viaduct. After a short stop to take in the view we continued on our way following an easy track enjoying the countryside.

We stopped for a short break by a picturesque lake and Manor/farmhouse where it started to rain. After gearing up against the rain we continued on our way around the lake and joining a path along a disused railway track, probably from the time when iron ore was being transported to the steel works in Corby.

When we left this track we circuited the edge of a sheep field, then across a ploughed field to head back to the Hatton Arms for a most welcome lunch
